

Job Title: Research Associate

List Biological Laboratories, Inc. is a privately held company located in Campbell. The company specializes in the production of both native and recombinant bacterial toxins used for research purposes as well as GMP toxins and live biotherapeutic products, for exciting and emerging industry, for use in clinical trials use.

List Labs offers a congenial small company environment, tremendous opportunities for learning a variety of skills and the convenience of working in the South Bay Area.

We are currently seeking for a highly motivated and detail-oriented individual to join our Research & Development group. The successful candidate will be responsible for the execution of routine testing in support of analytical development and will contribute to the development of analytical assays for characterization of products.

Duties and Responsibilities:

- Performance of assay development and analysis of protein and peptides using various methods such as HPLC, ELISA, SDS-PAGE
- Work with other research associates and scientists within and outside the team to design and execute experiments geared towards development of assays
- Performance of routine procedures following written instructions (SOPs, batch records, solution documents, protocols, etc.)
- Maintain a clear and detailed laboratory notebook
- Write protocols and technical reports
- Analyze data and communicate results to team and supervisor
- Operation and maintenance of standard laboratory instruments

Skills which will be developed in this position include:

- Protein characterization techniques such as SDS-PAGE, Western blot
- Knowledge and experience with immunoassays, such as ELISA
- Ability to carry out High Performance Liquid Chromatography
- Experience with problem solving, troubleshooting and quantitative analysis

Requirements and Qualifications:

- BS or MS in a biological science, biochemistry, chemistry or engineering.
- The candidate must be willing to take an active role in learning from others as well as self-training.
- Strong interpersonal, communication, analytical and organizational skills.
- Reliable and detail oriented.
- The candidate must be able to strictly adhere to standard operating procedures (SOP).
- Proficient in Microsoft Office applications (Word, Excel, Outlook, Access).
